

What's New in the Granicus Portable Encoder

This page contains a list of past updates and bug fixes released for the Granicus Portable Encoder, going back to November 2016. If a month is not listed, it means that there was no Portable Encoder release that month.

The Granicus Portable Encoder is on-premise software. This means that while the release first becomes available on the date shown, you may need to schedule an appointment with [Granicus Customer Care](#) to perform the actual upgrade.

November 4, 2016 Release

Introducing the New Granicus Portable Encoder

The Granicus Portable Encoder is an all-in-one hardware and software solution designed to make it easy to record, manage, and live stream high-quality videos wherever you decide to use it. Clerks and audiovisual staff are no longer limited to set public meeting spaces for recording meetings and events. Our portable encoding device is designed to make it easy to record, encode, and live stream high-quality videos from any location.

Rigorously tested and certified to work with Granicus technology, the Portable Encoder enables you to accomplish the following:

- Maintain the highest level of service at a low monthly cost
- Stream from any location at any time with an internet connection
- Provide mobile-device-compatible video
- Work on- and offline
- Transport and connect your device easily
- Simplify meeting setup

Contact your account executive to start using this solution.
